ASSEMBLY INSTRUCTION

SOLACE+CO Care Instructions

Please periodically check all fittings and re-tighten as necessary.

Upholstered furniture should not be exposed to direct sunlight for long periods.

Please do not place your upholstery in direct contact with a strong heat source. Leave a 30cm gap between upholstery and radiators.

Please do not allow children to jump up and down on the upholstery.

Avoid allowing pets on the upholstery as their claws may cause damage to the fabric.

Avoid sitting on the arms of the upholstery or on the front edge of the seat as this can compress the foam and damage the frame of your upholstery causing premature wear and distortion.

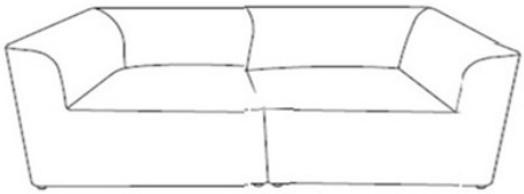

When your new sofa arrives, you may notice that some of the seating or back padding may have been creased or squashed during transit. This can be simply corrected by gently patting back into shape to re-distribute the filling and reshape the covering.

Our fixed cover fabric sofas can be cleaned by using water and a neutral soap to remove stains. Always apply the treatment to a concealed area first to test for colourfastness

Light vacuuming of the sofa will help to prolong the life of the covers. Be very careful, as some vacuum attachments have sharp edge that could damage your sofa.

In the unfortunate event of severe staining on the fabric, take expert advice from a specialist upholstery cleaning company before attempting to clean or remove the stain.

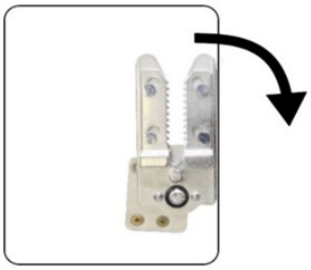

Join your elements together using the spring loaded latches.

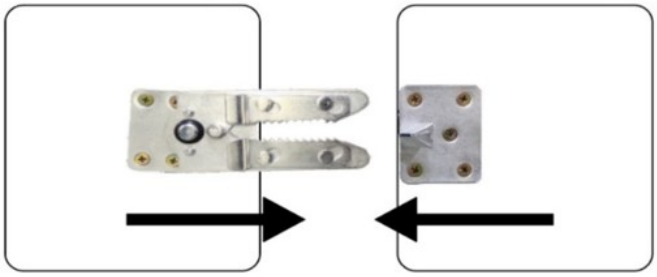

Position your elements as you want it configured, leaving a 1-foot gap between each piece. Feel along the bottom and pull out the latches on each side.

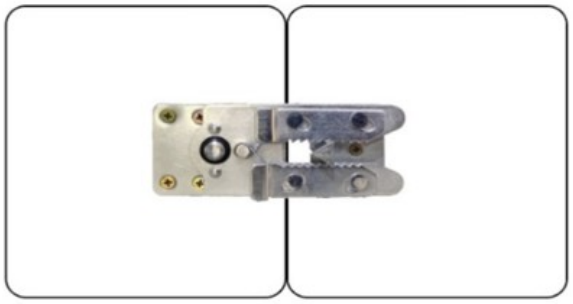

Step 1: Pull out the latch.

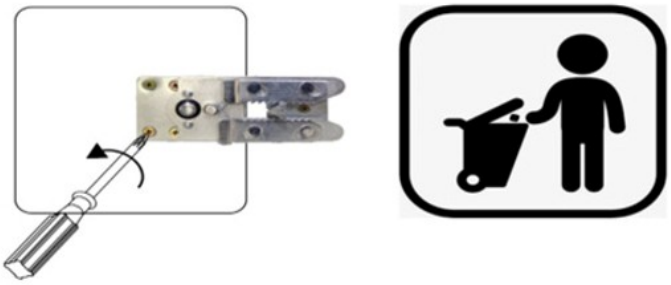

Step 2: Line up the latch with the adjacent catch bracket.

Step 3: Push the two furniture elements together, listening for a clicking sound, until the two pieces are touching.

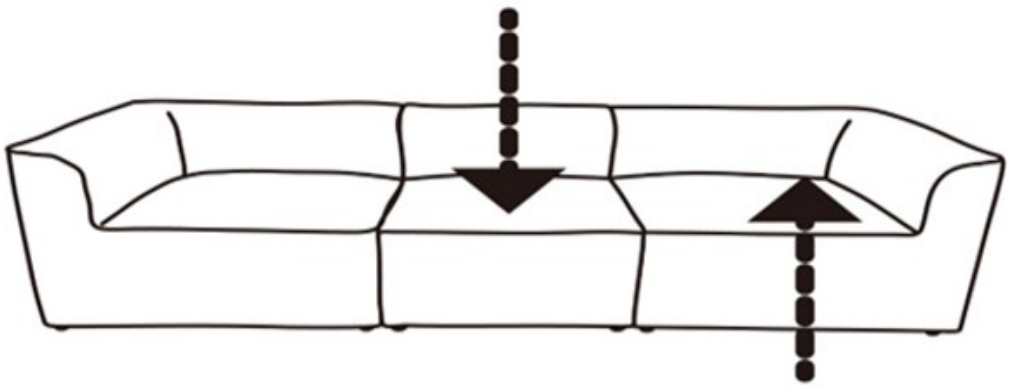

Step 4: If your unit doesn't include a Right corner section, remove the pull out bracket from the Middle section.

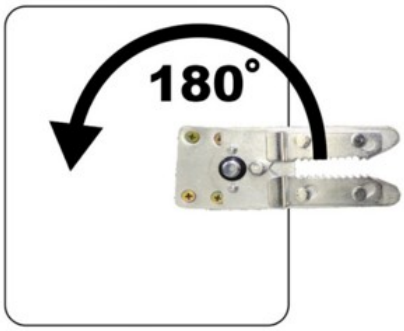

If you want to move your unit.

To separate the pieces lift the Right hand unit to release the brackets.

Storing separate elements safely.

Turn the latches so that they fully under the furniture piece.
